FOR IMMEDIATE RELEASE

[Highway Products Introduces the Pickup Pack™](#)

WHITE CITY, OR - (February 18, 2016) - The Pickup Pack™ from Highway Products is a unique alternative for companies or blue collar workers needing organized storage and lockup security without the cost of a service body. This package solution comes standard in an attractive aluminum body that can be easily installed on your pickup in a few hours. The "service body" in a Pickup Pack™ includes a headache rack, two full-length, lockable low-side boxes, a flat or dome center hatch, and a removable ladder rack. When closed, the hatch locks the tailgate, making the bed area secure and weather resistant.

The Pickup Pack™ turns any truck into a lockable service body without the following three negatives; weight, installation issues and cost. This pack can be combined with many of Highway's other products such as the Truckslide™, a Headache Rack or Gull Wing Tool Box. Custom add-on's including an LED light system can be added for those who get up early and finish when the sun goes down and need to be able to see into their toolboxes after hours.

For more information and the product video, please visit this page:
