FOR IMMEDIATE RELEASE

Loading and unloading your truck made simple with the Truckslide™

The Truckslide™ from Highway Products Inc. takes what used to be frustrating, difficult and often times painful and makes it convenient and easy! Unloading or accessing the gear, groceries or equipment in the bed of your truck has never been easy. But it is now. Built with either a 2,000lbs or 4,000lbs weight capacity, the Truckslide™ is a game changer.

We have had the same frustrations over the years and decided to create a solution. We know all too well the pain of crawling in the back of your pickup or reaching over the side for a 5-gallon bucket of paint, a tool box, your golf clubs, the groceries... the list goes on. Especially if you have a canopy, camper shell or Tonneau Cover installed! It's not always the case that what you're grabbing is heavy, but rather the classic case of being in an awkward lifting position your body was not made for. We've all been there. You have got to do what you can to save those precious shoulders and back muscles! With a Truckslide™ everything easily rolls out to where it can be reached or loaded up, saving you both the hassle and time it takes to organize the bed of your truck, one climb up and down at a time. The Truckslide™ works great in pickup trucks, vans, service bodies, motorhomes, and fifth wheel trailers.
